

RUTIK NARUTE

Los Angeles, CA | 626-493-1810 | rutiknarute25@gmail.com | linkedin.com/in/rutiknarute | github.com/rutiknarute | portfolio website

SKILLS

Languages – Python, JavaScript, TypeScript, C++, HTML, CSS

Frontend – ReactJS, React Native, Tailwind CSS

Backend – Node.js, Express.js, REST APIs, MySQL, MongoDB, Snowflake, GraphQL, dbt

Cloud & DevOps – AWS, Google Cloud Platform, Docker, Kubernetes, CI/CD, Git, GitHub

AI & LLMs – Claude Code, Claude Cowork, MCP Servers, Cursor, ChatGPT, Codex, GitHub Copilot, MCP Servers, RAG, CrewAI, Strands Agents SDK

WORK EXPERIENCE

AI Software Engineer Intern, Latina Hustle (LA-Tech.org) | Los Angeles, CA Dec 2025 – Mar 2026

- Fine-tuned **LLaMA 3.2 3B (QLoRA)** using **Python** and **PyTorch** on **2,658** instruction pairs synthesized from unstructured company documents without labeled data to reduce hallucinations in domain-specific policy and product Q&A to build a **CCPA-compliance**
- Analyzed massive **Shopify user sessions** to identify drop-off patterns for conversion with help of **Claude Code** and **MCP Servers**
- Led AI-generated product branding initiative using Flagship models (**OpenAI Images 2.0 & LLM APIs**), eliminating physical photo shoots, graphic design retainers, and modeling fees delivering marketing campaign ready visual assets at a fraction of cost
- Delivered **frontend UI/UX architecture** DNA across key platform sections, driving **25%** reduction in frontend changes through optimized typography systems and prototype workflows while leading AI native initiatives for **marketing and GTM**

Software Engineer Intern, DoorPeServices | Pune, India Jun 2024 – Aug 2024

- Collaborated with cross-functional development and product teams to architect and deliver full-stack features for a high-priority USA client project, adhering strictly to **Agile/SDLC** methodologies
- Leveraged **GitHub Copilot** to accelerate **debugging** cycles, **root-cause analysis**, troubleshoot production incidents and isolate runtime exceptions in legacy **Node.js**, code reducing overall time-to-resolution for critical client reported bugs by **30%**
- Participated in **code reviews**, testing, and sprint ceremonies, collaborating with product managers, QA engineers, and developers to deliver production ready software aligned with business requirements

Programmer Analyst, Cognizant Technology Solutions | Chennai, India July 2023 – May 2024

- Developed **Python** and **SQL ETL pipelines** extracting transactional data from flat files and relational source systems into Snowflake, handling schema design validation and transformation logic before target load
- Created and maintained **20+ Informatica PowerCenter/IICS** reusable mappings and workflows scheduling multi source ingestion jobs via Unix shell, standardized **modular transformations** over **ETL/ELT** pipelines
- Migrated from **Informatica IICS pipelines** to **Azure Data Factory**, rewrote transformation logic using **ADF Data Flows** and parameterized linked services to handle dynamic source configs
- Redesigned **Snowflake EDW** layer with **SCD Type 1, 2, and 3** dimension handling, implemented merge-based upsert logic in SQL to reconcile late-arriving source records

PROJECTS

Orin – Supply Chain Compliance & Digital Product Passport Platform – 2026

- Designed a multi-tier supply chain mapping system using **Google Antigravity** and **LLM APIs** that auto-generates data requests across Tier 1, Tier 2, and Tier 3 suppliers giving fashion brands full product traceability without manual supplier follow-up
- Created an AI document intelligence engine using **OCR and LLM extraction pipelines** to pull material composition, certifications, and expiry dates from raw PDFs normalizing them into validated **EU Digital Product Passport** compliance records with QR codes and **API/CSV** webhooks to follow ESPR regulation

Meal Planner Application – 2025

- Built a system with **Node.js**, **Express.js**, and **MongoDB** to handle user accounts, recipes, and meal plans; integrated the **Spoonacular API** for recipe discovery with dietary filters and persistent user reuse
- Created authentication and authorization using **JWT** and **middleware**; customized **REST APIs** for meal plan creation, retrieval, and storage while optimizing **MongoDB** schemas for fast access

PUBLICATIONS

Deep Learning-Based Facial Emotion Recognition & Student Engagement Detection – Rutik Narute, Vishal Jadhav, Vinay Divekar. Published in *IJRAR*, 2023. [Link]

EDUCATION

California State University, Los Angeles Los Angeles, CA
Master of Science in Computer Science Aug 2024 – May 2026

- Relevant Coursework – Advanced Web Programming, Advanced Artificial Intelligence, Advanced Data Science

Savitribai Phule Pune University Pune, India
Bachelor of Engineering in Information Technology Aug 2019 – May 2023

- Honors in Artificial Intelligence and Machine Learning – Machine Learning, Deep Learning, Artificial Intelligence
